TSR (Tire & Specialty Rubbers), a business unit of the ARLANXEO group, is one of the world's leading suppliers of high quality rubbers for the tire and for other highly demanding rubber related industries. With a truly global production footprint, TSR has the scale needed to tackle supply driven challenges throughout the entire rubber supply chain. With comprehensive rubber know-how, research and development and application technology under one roof, they offer a broad portfolio of versatile elastomers, such as butyl and butadiene rubbers, that are predominantly used in the production of tires. Their butyl rubber products, such as halogenated butyl rubbers (Halobutyl), are used in the innerliner of tires to provide excellent retention of the desired inflated pressure. The solution styrene butadiene rubbers (S-SBR), Buna VSL and Buna FX, and neodymium catalyzed butadiene rubbers (Nd-BR), Buna CB and Buna Nd EZ, are used in treads, sidewalls and other components of tires. Also included in the portfolio are the general purpose emulsion styrene butadiene rubbers (E-SBR), Buna SE.

TSR is part of the ARLANXEO group, one of the world's leading synthetic rubber companies with total sales of around EUR 2.8 billion in 2015. TSR is headed by Jorge Nogueira.
